

MEDIA RELEASE – EMBARGOED UNTIL 9PM (GMT + 1) TUESDAY 19 OCTOBER 2021

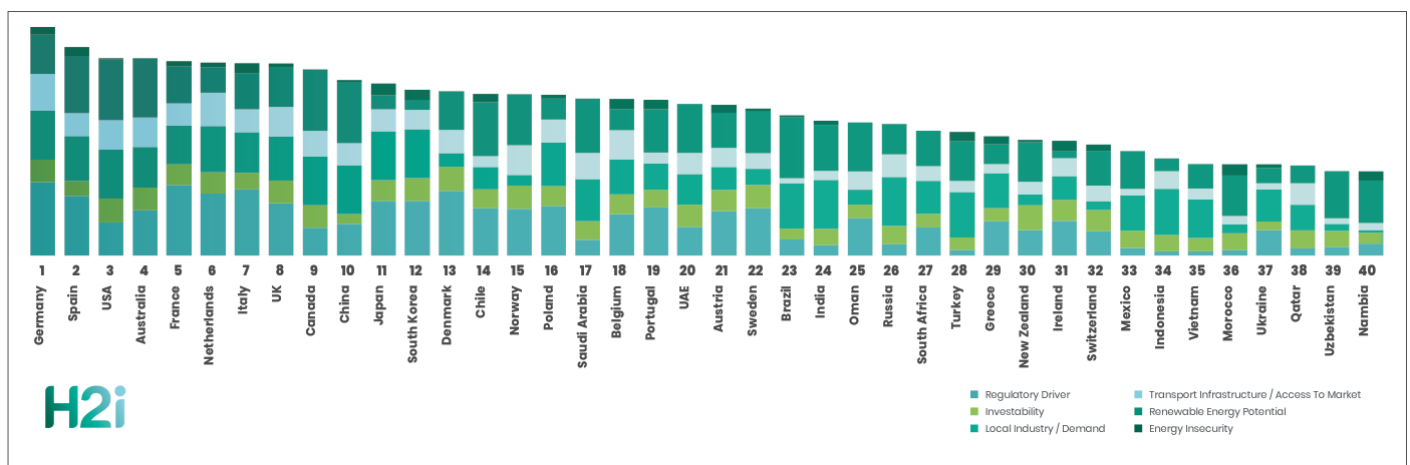

Cranmore Partners and Energy Estate launch Hydrogen Investability Index

Cranmore Partners (“Cranmore”) and Energy Estate are excited to launch the Hydrogen Investability Index (H2i). H2i is the first international country ranking of its kind in the hydrogen space and provides an in-depth analysis and ranking of the top 40 countries in terms of attractiveness for investment for low emission hydrogen projects. Each country’s ranking is based on a comprehensive assessment of investability, regulatory support, renewable resources, transportation and storage infrastructure, local demand and energy security.

Many of the world’s leading economies see investment in green energy as a key component of their strategy to revive and revitalize their economy post-pandemic and meet their net zero goals. This index seeks to give investors and other stakeholders a deeper understanding of the attributes of different countries and the factors which will influence investment flows and project development timelines.

“The global energy transition presents an unparalleled opportunity for investors. Green hydrogen has the potential to rapidly replace fossil fuels at scale and complement greater levels of electrification. We have developed this index to provide clarity on the key drivers for investment in clean hydrogen”, said Yusuf Macun, Managing Partner at Cranmore.

“This index will accelerate the development of the hydrogen industry by giving investors greater visibility to the factors which encourage investment. The top 10 countries have already demonstrated real commitment to the growth of the market. What is exciting for us is the global reach of green hydrogen with such a wide spread of countries already performing well in the ranking.” said Simon Currie, Principal at Energy Estate.

About Cranmore Partners

Cranmore Partners is an award winning financial advisory boutique focusing on the infrastructure and energy sectors, operating across EMEA and Asia, out of hubs in London, Istanbul, Abu Dhabi and Delhi. With a strong focus on sustainability and energy transition, Cranmore advises global and regional strategic players, financial investors, governments, and financiers around the world on, inter alia, the debt and equity financing and commercial optimisation of their strategic infrastructure and energy projects.

Cranmore today is one of the leading financial advisors globally on green hydrogen equity and debt structuring through its involvement in pioneering projects, and, since its inception, has brought to financial close a number of first-of-its-kind transactions in the energy transition space. Most recently, Cranmore was awarded the IJGlobal MENA Advisor of the Year 2020.

About Energy Estate

Energy Estate's mission is to accelerate the transformation of the energy sector and decarbonisation of industry.

Energy Estate's HydrogenGrowth platform, together with our utility scale renewables and long duration storage platforms, forms our "Transition Initiative". The HydrogenGrowth platform is designed to accelerate the development of hydrogen, ammonia, and green chemicals projects (and associated infrastructure) on a global basis, with a pipeline of large-scale green hydrogen projects in Australia, the US and Chile.
